

Vision and Values

Company Profile

mpowerdome Pty Ltd is a program and service contributor to the Sport and Recreation, Health and Education sectors.

mpowerdome is a totally Australian owned company. It was formed in 2006 and operates out of the largest indoor multi-sport, multi-purpose facility of its kind, in Australasia.

The mpowerdome facility represents a daring approach to providing an environment where grassroots participation is accessible to everyone and athlete development is given full expression through experience of many sports and physical activity. This approach recognizes that all participants deserve expert facilitation, coaching and instruction at given milestones throughout life. In addressing these milestone needs, it is mpowerdome's objective to also contribute to the health and wellbeing of the community by responding to the many challenges of national and global health concern.

The company believes that everyone has value and a given potential. And that everyone deserves the opportunity to be the best they can be.

mpowerdome staff members are also committed to being the best they can be; hence they regularly engage in professional and personal development opportunities. They are also passionate about what they do and aim for quality while providing an 'entertraining' experience.

The responsibility of customer service, coach, facilitator and instructor are also taken seriously so we seek to provide a safe and respectful environment to complement *YOUR sporting experience*.

Over the past fifteen years significant research has contributed to the design and development of targeted physical activity programs for the broader community. These programs are surrounded by a variety of community sport and recreation programs; sports coaching; fitness programs; venue hire and events.

mpowerdome also values quality professional relationships and enjoys a strong industry network with the sport and recreation sector, government, national and state sporting bodies, health, education, university and vet sectors, not for profit and community organizations.

As the company's reputation has grown in targeted program development and delivery, a business restructure was vital in 2009 to enable a national and international rollout of its targeted programs. mpower minis is the first of its targeted programs to be franchised and the company is hopeful that 2011 will demonstrate its potential for national and international rollout.

Commitment to Health Promotion, Industry Compliance, Environmental conscience and duty of care.

mpowerdome

- ❖ is a health promoting facility with high regard for an environment that encourages respect for self and each other;
